

Good for: Removing pigment and sun damage and improving skin tone and texture for a radiant appearance.

Lasts: The effects can last for years with regular treatments and proper skin care.

Feels like: Warm tingling as the laser passes over the skin.

BEFORE

AFTER

Los Gatos, CA dermatologist Steven Swengel, MD performed two LaseMD GLO treatments to diminish this patient's melasma.

BEFORE

AFTER

This patient's sun damage and wrinkles were reduced with three LaseMD GLO treatments, performed by Charlotte, NC dermatologist Gilly Munavalli, MD.

Refreshed + Radiant

Whether you are looking for a light resurfacing laser to give your skin a “boost” before a special occasion or a deeper treatment to address fine lines, pigmentation and moderate-to-severe sun damage, LaseMD GLO is the perfect, easy addition to your skin care routine. Best of all, the treatment even provides a long-term solution that can help prevent future skin damage.

INSIDER INFO

6-20
MINUTES

The length of a typical treatment depending on the patient's concerns

Versatile Treatment

More than just a cosmetic device, LaseMD GLO is also FDA-approved to treat actinic keratosis (or AK), a pre-cancerous skin growth.

Lunchtime Laser

While you may experience some redness post-treatment, this is one laser you can get over your lunch hour—with some time to spare.

Fresh-Faced

Be prepared to be complimented on your complexion. When redness subsides (typically the next day), skin appears luminous and feels baby-soft.

The Customization Factor

Besides having innovative technology, LaseMD GLO is designed to deliver a unique and individual patient experience. It can be used on all skin types and all ages, and it is totally customizable. Plus, patients appreciate the fact that it's fast and relatively comfortable.
